

1. Variables should be named in **camelCase** style.

Examples:

- someVariable – camelCase, **OK**;
- SomeVariable – PascalCase, **NOT OK**;
- some_variable – **NO-NO-NO**.

2. Indents **MUST** equals to **4 spaces**. You can use tabs, not spaces, but before PR, you should to transform tabs into spaces.

3. **Human-readable variables. Use english.**

Examples:

- exit – **OK**;
- dd2 – **NO**;
- vihod – **NET, TAK NE POIDET**.

4. Avoid blank lines. Leave lines blank only if it **improves readability** of the code. Don't abuse it.
